

Fig. 9 is a cross-sectional view of a curved, elongated component, likely a blade or vane. The component has a curved outer profile and a central axis labeled A-A. The interior of the component is filled with diagonal hatching lines. A label '9' points to the outer curved surface.

Section A-A

This diagram shows a cross-section of the first embodiment of the device. It features a central core 3a with a diagonal hatching pattern, surrounded by a layer 3b with a different diagonal hatching pattern. The entire assembly is enclosed in a housing 14. A central opening 6 is visible, and a layer 15 is shown at the bottom of the housing.
